

JungleJungle

1989–1999 Samplepack

This pack is made up of samples taken from tracks in our record collections. It started as a bit of fun to kill time in between proper music work and suddenly became quite large, so it seemed a shame not to share it.

- Size - 390mb
- Contents - 650+ breaks, basses, pads, riffs, hits, vocals & FX
- Format - All samples taken from vinyl or CD and saved as 16-bit WAVs.
- No mp3s were involved at any point in the process.
- All samples are cropped & normalised.
- The earliest sample in the pack is from 1989 and the latest is from 1999.
- This pack was created for fun and is not to be sold.
- These are all samples (or samples of samples) from commercially released tracks, use them in your productions at your own risk.
- Please don't contact us asking if or how you can get licences to use these samples, or to ask us for the sample sources. We won't reply to you, sorry.

If you want to share the sample pack, point people at blumarten.bandcamp.com

If you're not already familiar with how drum & bass came into being, we encourage you to go back in time and explore the history. There's some amazing music waiting for you there.
